📍 At Karla ta. Anjangoan Surji, Dist. Amravati, Maharashtra 444905

Profile

Motivated and results-driven BE - Electronic and Telecommunication Student with strong expertise in Data Science, Machine Learning, Artificial Intelligence, and Software Development. Proficient in Python, SQL, Pandas, NumPy, Scikit-learn, PyTorch, Power BI, and data visualization tools, with hands-on experience building and deploying end-to-end Data Science, Machine Learning, RAG, and Generative AI projects. Strong problem-solving abilities demonstrated through solving 400+ DSA problems and developing real-world applications. Passionate about leveraging data and AI technologies to solve complex business challenges, continuously learning emerging technologies, and contributing to innovative, data-driven organizations while growing as a Data Scientist and AI Engineer.

Education

BE - (Computer Science and Information Technology), <i>Dr rajendra gode Institute of technology and research</i> CGPA: 8.09	08/2024 – 04/2028 Amravati
HSC (Science), Maharashtra State Board Percentage: 74.50 %	02/2024 Badanapur
SSC, Maharashtra State Board Percentage: 84.60%	03/2022 Karla

Skills

Programming & Query Languages java - DSA(400+Leetcode Problems) SQL python	AI-ML & Deep-Learning Linear & Logistic Regression Decision Tree & Random Forest ANN & CNN & RNN NLP & RAG
Data Analysis & Libraries Pandas NumPy Matplotlib Seaborn Scikit-learn PyTorch	Key Strengths Problem Solving, Data Analysis, Machine Learning, Deep Learning, Generative AI, Python Programming, SQL, DSA, Critical Thinking, Team Collaboration, Quick Learning, Communication Skills, Project Development.

Achievement

Open Source Contributor, Nexus Spring of Code (NSoC) • Secured Rank 300 among 990 participants in Nexus Spring of Code (NSoC) 2026. • Contributed to open source repositories by fixing bugs and improving existing features. • Collaborated with mentors and contributors using Git, GitHub, pull requests, and code reviews. • Worked with issue tracking, version control, and collaborative software development workflows.	03/2026 – 06/2026 Amravati, Maharashtra
--	--

- Enhanced problem-solving and software engineering skills through real-world open-source contributions.

Cgpa

8+ cgpa

Projects

Number Recognition System using Machine Learning & Deep Learning

Developed a handwritten digit recognition model to classify numerical digits from image inputs using Machine Learning and Deep Learning techniques. Performed image preprocessing, normalization, and feature extraction to enhance model accuracy. Built and trained Neural Network models using Python, TensorFlow/Keras, NumPy, Pandas, and Scikit-learn. Implemented an end-to-end pipeline for data processing, model training, evaluation, and digit prediction. Evaluated performance using accuracy, precision, recall, and classification metrics to ensure reliable predictions. Applied Computer Vision and Deep Learning concepts for real-world pattern recognition tasks.

AI Video Assistant (RAG + LLM)

- Developed an AI-powered Video Assistant that enables users to interact with video content through natural language conversations.
- Built a Retrieval-Augmented Generation (RAG) pipeline to extract, process, and retrieve relevant information from video transcripts.
- Integrated Large Language Models (LLMs) to generate context-aware and accurate responses based on video content.
- Implemented text embedding and vector database storage for efficient semantic search and information retrieval.
- Developed a user-friendly interface for asking questions and receiving instant answers from video knowledge bases.
- Applied NLP techniques for transcript processing, chunking, embedding generation, and contextual retrieval.
- Designed an end-to-end workflow covering video ingestion, transcript extraction, vector storage, retrieval, and response generation.
- Improved information accessibility by allowing users to quickly locate key insights from lengthy videos without manual searching.
